

Sturdy cabinet constructed from medium density fibreboard 2,5cm (1in) thick with melamine coating.

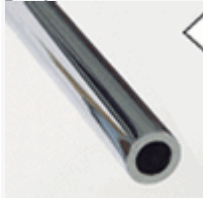

Colour: black with ITSF logo and official Training plate with series number.

9 x 9cm (4x4in) metal legs coated with long-lasting silver painting.

New type heavy duty competition leg levellers for a perfectly flat playfield on all surfaces.

Going-through high stress resistance machine-trued hollow steel bars - diameter 16mm - coated with anti-rust chromium-plating- The quality of the materials used adds to the thickness of 2,2mm to prevent the bars from bending, maintaining a perfect shape for a long time.

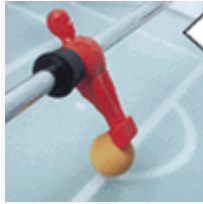

21mm long rubber bumpers instead of springs. The rubbers maintain a consistent distance between the player and the wall, preventing the ball from passing by, and allowing the ball to be trapped gently against the wall. They consequently reduce or remove the 'dead spots' on the 3-rod. Also the game is quieter, with less noise against the cabinet during play.

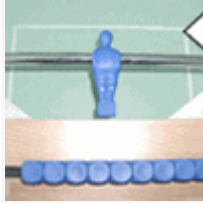

Distancing rubber on the goalkeeper bar maintaining the player within the goal range of action.

Steel roller bearings to greatly improve the game speed, while reducing the stress for the players' wrists.

One-colour players in plastic material (moplen) representing a stylized human figure, directly moulded onto the bars: they do not move, cannot be displaced and maintain their positions perfectly. Team colours: red and blue.

Available with fully rotating (360 degrees) goalkeeper only.

Plastic handles with ergonomic grip.

Playing field of tempered non-reflective sanded glass. Green background with white lines to look like a football ground.

New playfield corners without steps for a correct ball running.

Balls served through a filler on each table side.

Quick and easy ball recovery through an exit behind each goal.

Competition abacus score counters enabling to mark game sets and goals.

10 white Standard balls supplied
